Integrated Governance, Risk & Compliance Management

Addressing legal and regulatory compliance is one of the most complex tasks facing business today. Delivering an effective strategy for continued growth and development while implementing controls for a changing business landscape, such as Sarbanes Oxley and Basel II, makes the executive's role increasingly difficult.

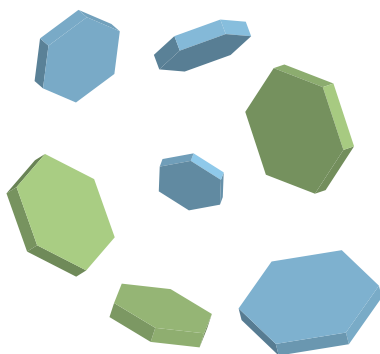

In many instances compliance can be expensive and complex. With separate teams addressing separate requirements change is often slow, unwieldy and prone to unnecessary duplication.

Pirean deliver consulting and technology services to help you realise tangible benefit from your compliance initiatives. Our solutions and consultancy portfolio is not just focused on reducing risk, but also integrating IT processes in line with your business goals.

As an organisation, our approach is founded not only on addressing Governance, Risk and Compliance; but also making valuable business information available to the different facets of the organisation on time and to specification.

Delivered on a best of breed software platform from IBM, Pirean's solutions enable compliance and best practice to ISO 20000, ISO 27001, ITIL and COBIT whilst reducing manual effort, improving communication for accelerating business performance.

Disparate Business Processes

Disparate Governance Compliance & Risk Management Strategies

The Pirean Approach

- Focusing IT service on business goals
- Guaranteeing availability performance and integrity
- Founded on ISO 20000 ISO 27001, ITIL and COBIT

Governance, Risk & Compliance Solutions Aligned To Business Goals

About Pirean

Pirean is a management consulting, technology services and outsourcing company. We work with our clients to help them address changing business and technology issues.

Pirean deliver recognised expertise in Quality Management, Information Security Management and IT Service Management through services benchmarked to ISO 9001, ISO 27001 and ISO 20000 Standards.

Working in partnership with our clients, providing expertise and experience, we offer a wide range of solutions to enable you to address today's challenges and exceed tomorrow's goals.

For more information about Pirean's services and accelerators for Governance, Risk and Compliance, call 0845 226 0542 or visit www.pirean.com

Pirean help you to create a scalable, reactive approach to compliance that doesn't need to be radically overhauled as new challenges emerge. Working in partnership, we generate an environment for greater business intelligence and continuous improvement through integrated solutions for best practice.

In doing so, your investment in governance and compliance becomes a valued, proactive business enabler which demonstrates your service commitment to customers, partners and auditors alike.

Our consultation services form the foundation for a service designed to match your challenges. With a team of expert consultants, all Pirean solutions are deployed and assured for performance. We have proven expertise in the deployment of IBM software and deliver continued synergy with your business goals through our turnkey accelerators and service solutions.

The Benefits of an Integrated Approach To Governance, Risk and Compliance

Centralised resource for monitoring, reporting, management and information distribution

Easier management across the entire enterprise, increased reactivity and cross discipline collaboration

Swifter problem identification and management, more accurate problem analysis and resolution

Reduced risk of manual error

Less opportunity for non-integrated technologies to fail

Reduced total cost of ownership for the entire compliance strategy

Improved IT Services designed to deliver business focused services

Alignment to proven strategies for best practice (including ISO, ITIL and COBIT)

Clearer channels between technologies

Easier integration with business partners and supply chains

Enhanced customer perception

Pirean's services accelerate the security, performance and availability of systems, whilst building a framework for pro-active compliance processes. This approach is both cost effective and forward thinking - combining governance concerns with centralised resources for business intelligence across the entire business - in the right format, at the right time, safely and securely.
