Enterprise Policy Management made simple

Ensuring that company policies are known and understood is fundamental to business from both a legislative and operations point of view.

Ensuring that staff understand their responsibilities and commit to following company policy and procedure is pivotal to operational success.

To address these issues Pirean have developed Policybase, a policy management and administration solution built on industry recognised best practice.

Policybase provides an industry leading approach to policy management, dramatically cutting the cost and time of traditional policy programmes, automating everyday reporting functionality and demonstrating ongoing policy adoption and compliance.

Providing a single, comprehensive solution for enterprises to co-ordinate, communicate and educate their workforce, Policybase puts the organisation and its experts in control of corporate policies and compliance programmes through:

- Central education and certification, online and on demand
- Rapid creation and delivery of online training and test solutions
- Simple to deploy, easy to maintain user management
- Industry leading audit and compliance functionality, exceeding common standards including BS 7799 and ISO 9001

Policies are an essential platform through which organisations can display their commitment to internal and external conduct and best practice. But the 'policy dilemma' dictates policies are often misunderstood or access to the right policy at the right time isn't possible.

Policybase enables organisations to demonstrate and disseminate policy commitments in the most efficient match to working practices. Through its distributed management consoles the entire policy management team can work together to enable company-wide understanding whilst information gathering from Policybase's comprehensive reporting dashboard to monitor user response.

Delivered direct to the desktop via a web-top interface, Policybase is available organisation-wide, ensuring that everybody understands their responsibilities and how to carry them out.

Whatever the driver for policy management; from the data protection and freedom of information acts to information security management, IT Service management, quality assurance, health and safety or equal opportunities – Policybase makes the management, distribution and measurement of multiple policy programmes simple.

Key Features:

Simple framework management

One Policybase server can store and administer multiple management systems.

Centralised policy Management

A single, secure policy store eradicates unnecessary duplication of policies and security controls and ensures delivery to the correct audience.

Audit Manager

Administrators can view every action associated with every user in the system, for the effective control and deployment of policies to meet audit requirements.

Technology Friendly Presentation

Users require little technical ability to use the system, navigate policies or sit tests.

Automated Approval

The Policybase approval mechanism allows organisations to define approved experts, ensuring the right people sign off every communication before publication.

Enhanced Management

Policybase reduces the effort required to manage policy programmes through automation and in-built intelligence.

Compliance Made Simple

Using detailed reports or the Policybase compliance dashboard, organisations can view progress, analyse performance and identify issues with policy deployment, adoption and compliance.

Lifecycle Management

Policybase ensures the correct policies are available to the right people at the right time, tracking policy updates, administering regular reviews across authors and distributing information to individual users, departments or the whole organisation.

Attachment Manager

Policybase accepts files of any format, delivering a secure repository through which to associate related documents with policies.

Multimedia Manager

Policybase displays all rich media, whether audio, video, Macromedia Flash® or Microsoft PowerPoint® presentation through an integrated interface.

Rapid Deployment

From initial install and configuration to user registration, policy deployment and adoption; Policybase enables the deployment of a complete solution in a matter of minutes.

Simple User Management

Whether creating Policybase specific users, Microsoft Active Directory® or and LDAP compliant infrastructure, Policybase simplifies the management of thousands of users across hundreds of departments.

SQL Server Scalability

Built on Microsoft SQL server or MSDE technology, Policybase is not just secure, but also scalable.

Quiz Generator

Administrators can demonstrate understanding and policy adoption through easy to author multiple-choice quizzes.

Internal Feedback & Continuous Improvement

The Policybase feedback mechanism allows any user to submit their response to content to provide confirmation of policy success and adoption.

Policybase is currently delivered on Microsoft Windows Server 2000® and Server 2003® and can be deployed using an internal Microsoft SQL Database Engine or can connect to an external Microsoft SQL Server 2000® database.

Policybase is available as a standalone deployment or hosted through Pirean's own datacenter.
