Monitoring • Provisioning • Identity • Storage

Your business needs to be at the forefront of innovation. To grow in an ever-competitive market you need to be responsive and flexible to meet the needs of your customers. You need to understand where demand is, where it will be in the future and how to supply it.

Service is everything.

For technology to deliver real benefits to your business you require an on demand infrastructure. An infrastructure which supports the ever changing requirements of the business and enables new routes to market.

Your business is benchmarked against the industry's top performers, isn't it time your infrastructure was too?

Introducing Pirean's mid-market solution set, built on the IBM Tivoli Express Portfolio.

Comprising world-class solutions for Configuration, Performance, Security and Storage Management, the IBM Tivoli Express portfolio is an affordable route for growing IT infrastructures to deliver best practice services. Deployed swiftly and effectively by Pirean, Tivoli Express solutions are simple to integrate, manage and scale, deliver fast time to value and provide secure access for the right people anytime, anywhere - whilst protecting systems from crashes, viruses and external threats.

Pirean and the IBM Tivoli Express Portfolio deliver solutions for:

- Monitoring
- Provisioning
- Identity Management
- Storage Management

Enterprise capability without enterprise cost.

Pirean and IBM Tivoli Express help you to grow, respond to market changes and out perform your peers at a price growing businesses can afford.

Together, Pirean and the IBM Tivoli Express Portfolio enable businesses to implement best practice solutions for the key issues facing IT infrastructure.

Monitoring: IBM Tivoli Monitoring Express

IBM Tivoli Monitoring (ITM) Express delivers management and monitoring capabilities for heterogeneous environments to avoid bottlenecks, performance impacts, and outages. With rich availability data delivered from a single centralised portal, ITM Express allows businesses to identify problems early before they impact system performance.

Provisioning: IBM Tivoli Provisioning Manager Express

IBM Tivoli Provisioning Manager Express provides inventory management and software distribution services. From asset management to software distribution and patch management – all through a secure, web-based interface. TPM Express ensures that essential software, upgrades and security patches are deployed to every machine that requires them whilst removing the cost of manual distribution, installation and support.

Identity Management: IBM Tivoli Identity Manager Express

IBM Tivoli Identity Manager Express enables the control of user identities and access rights across the organisation, including internal users, as well as customers and partners through the Internet. By establishing a central point to manage user rights, Tivoli Identity Manager Express enables you to automate user provisioning, including approvals and account creation, as well as user de-provisioning to mitigate the risk of invalid accounts and privileges.

Storage Management: IBM Tivoli Storage Manager Express

Tivoli Storage Manager Express uses the proven technology of IBM Tivoli Storage Manager to reliably backup and recover vital data. Storage Manager Express backs up directly to disk and uses the familiar “son-father-grandfather” hierarchy. Off-site backups can be created to tape at a time during the day that meets the administrator’s schedule. It can be installed, configured and conducting its first full backup in less than 30 minutes.
